### NOTES:

- Please note that the band members swap instruments and stage positions almost every song, therefore a basic even vocal blend across all monitors is much appreciated. No separate EQ is really needed as they move around.
- Vocal effects – a nice “John Lennon” type tape slap echo (around 120-140ms) is preferred.
- WALK UP MUSIC: **Tom Jones “What’s New Pussycat”**. Please play at set time at a louder level than previous playlist setting, and the band will walk up about a minute into the song.
